Crosswalk & Pedestrian Safety Tips

Pedestrian safety is crucial in large facilities such as warehouses, manufacturing plants, and distribution centers, where heavy machinery and vehicles are often in operation. Here are the top ten safety tips for pedestrian and crosswalk safety in these environments:

1 Use Crosswalks

Always use marked crosswalks and pedestrian lanes when available. Wait for the signal or a clear indication that it's safe to cross.

2 Stay Alert

Before stepping into a crosswalk or walkway, look in all directions for potential hazards. Don't assume that equipment operators will stop automatically, and don't assume that they can see you.

3 Obey Signs & Signals

Signs and signals may be hung from overhead or applied to the floor. Always follow posted instructions to avoid collision and potential injury.

4 Stay Clear of Loading Zones

Avoid walking near loading docks and loading zones where trucks and forklifts are active. These areas can be particularly hazardous.

5 Communicate with Operators

If necessary, use hand signals or gestures to communicate with equipment operators to indicate your intentions. Be clear and visible.

6 Know the Rules

Familiarize yourself with the facility's safety rules and guidelines for pedestrians. Follow all posted signs, signals, and instructions.

7 Use Designated Walkways

Stick to designated pedestrian walkways and pathways. Avoid walking in areas where vehicles and machinery are operating.

8 Wear High-Visibility Clothing

Wear high-visibility clothing, such as reflective vests or jackets, especially if working in low-light conditions or areas with limited visibility.

9 Avoid Distractions

Pay close attention to your surroundings. Do not use headphones or mobile phones while walking in the facility.

10 Make Eye Contact

When crossing paths with operators, try to make eye contact to ensure they see you and are aware of your presence.

Remember that safety is everyone's responsibility, and both pedestrians and operators should be vigilant and cautious. It's crucial to promote a culture of safety and awareness to prevent accidents and injuries.

Crosswalk & Pedestrian Safety Floor Marking Solutions

AccuformNMC's floor marking solutions serve an endless variety of settings, including industrial, commercial, healthcare, and education. They convey important information, organize spaces, enhance safety, and improve operational efficiency. Here are some common use cases and applications:

FLOOR MARKING SOLUTIONS

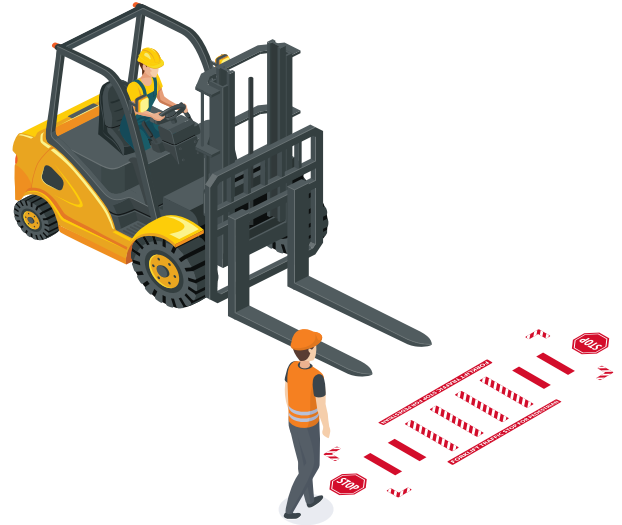

Floor marking solutions are a versatile tool that contributes to a safer, more organized, and efficient work environment, ultimately leading to enhanced productivity and improved overall operations.

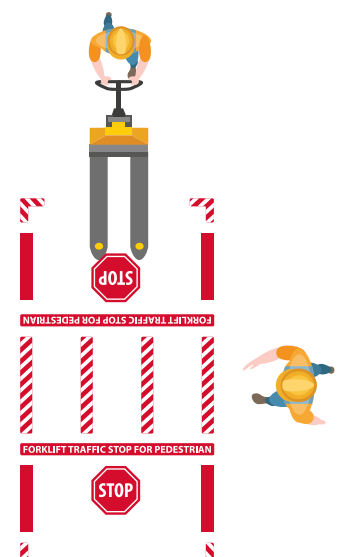

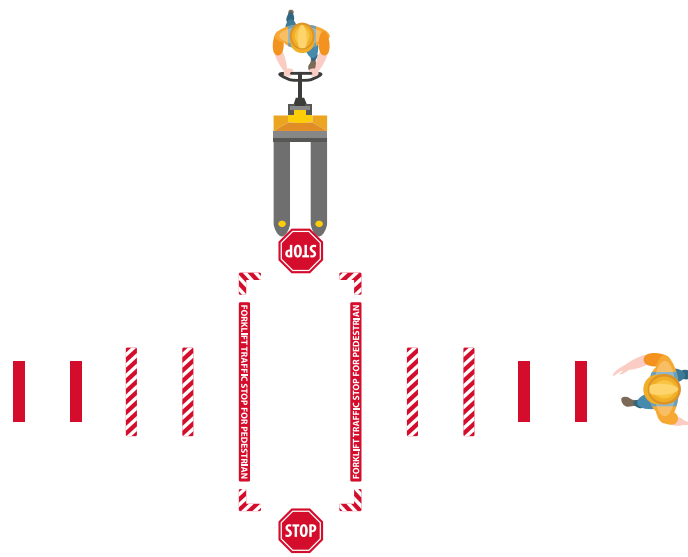

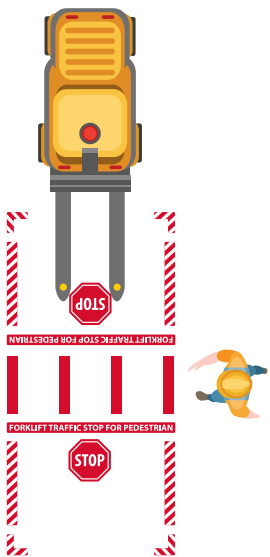

NEW Slip-Gard™ Crosswalk Kits

Clearly marked crosswalks and walkways play a critical role in workplace safety by better controlling traffic flow. Avoid collision and injury by providing clear, visual direction and instruction for workers and equipment operators of forklifts, pallet jacks, stackers, and other industrial vehicles.

- Ideal for use in distribution & fulfillment centers, manufacturing operations, and other industrial settings.
- Material: Slip-Gard™ Vinyl with strong adhesive backing pebble textured, slip-resistant protective overlaminates.
- Kits include a variety of shapes for layout in any configuration and ships on a 24" x 48" sheet.
- Size of crosswalk/walkway varies based on layout. Each kit covers an area ranging from 3' wide up to 12' in length.
- Installation: Cut and place shapes in desired layout before removing adhesive backing, mark floor as needed. Apply to clean, smooth surface for best results.

Slip-Gard™ Floor Marking Kits

Pre-cut floor sign kits help keep areas in front of fire extinguishers, electrical panels, emergency showers/eyewash stations, and any other equipment free and clear of obstructions. They can also be used to designate areas where equipment, waste, and materials should be stored.

- Includes eight piece pre-cut border and 12" x 12" diamond floor sign
- Pressure-sensitive, adhesive vinyl
- Features non-slip, textured overlaminat

Unit	Size
Kit	16" x 24" Sheet

Configurable in any space!

Crosswalk & Walkway Stencils

Floor Marking Stencils provide the means to paint a message and symbol over and over again on floors and walls. Stencils are made of polyethylene plastic - to withstand rough handling. They are made to last and are easy to clean - after paint has dried, roll the stencil to flake off excess paint.

NEW LED Crosswalk Projectors

LED Crosswalk projectors include a range of benefits to enhance pedestrian safety, improve traffic flow, and contribute to a safer environment.

- Brighter and more distinct than alternative solutions for better contrast against surface
- Withstands wear and tear better than painted lines
- Two different style crosswalks available: Style 1 - STOP (red, white & yellow)
- Style 2 - CAUTION (green, white & yellow)
- Select your ideal mounting height from our predetermined options tailored to your facility's requirements and we'll handle everything, ensuring a reliable and bright 3-foot by 10-foot projection every time.
- 200W LED Crosswalk Projector is made of heavy duty cast aluminum.
- Over 40000-hour (4.5 to 5-year) life cycle
- Plug and Play operation with 6' cord
- IP65 rated
- Equipped with mounting hardware
- Compatible with our plug and play motion sensor, part number VPL3MS (sold separately)

10-ft x 3-ft Crosswalk

Provides a Consistent Level of Brightness Regardless of Mounting Height.

Laser Line Projector

Laser line projectors excel in applications that need precise alignment or positioning, particularly in the creation of pallet assembly areas and receiving docks.

- Project a laser line along the floor surface to guide forklift drivers to the precise unloading location for pallets.
- Each projector casts a single line that can measure up to 36-ft.
- Includes adjustable covers at the lens to shorten laser line lengths if needed.
- Average projector lifespan approximately 9600 hrs. (2.5 years)
- Mounting height should not exceed 15-ft

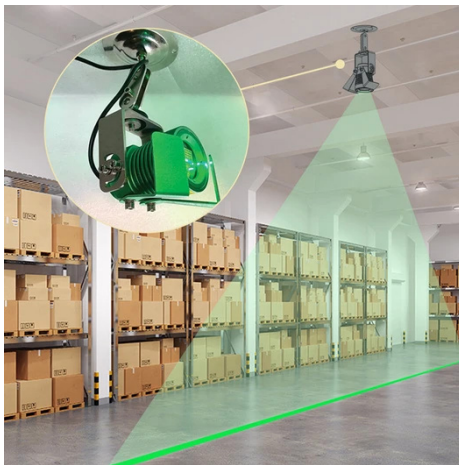

Precision, Laser Sharpness

Providing superior contrast against surfaces

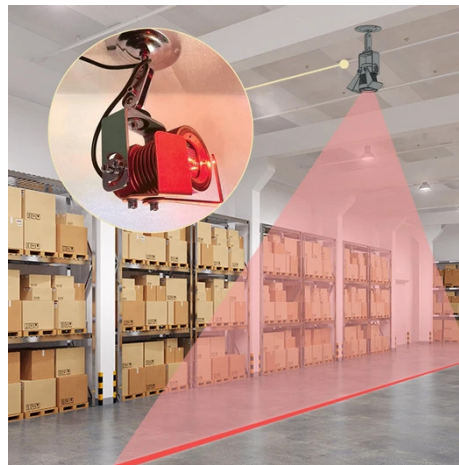

Unit

Each

VPL111

VPL122

To Calculate Line Projection Length:

Mounting Height (in feet) x 2.4 = Approximate Line Length

Line width is slightly wider on higher mounting height.

Example: 15-ft mounting height = 36-ft long line, at 1/2" wide

Projection Diagram

At 10 FT Height
24 FT Line

At 15 FT Height
36 FT Line

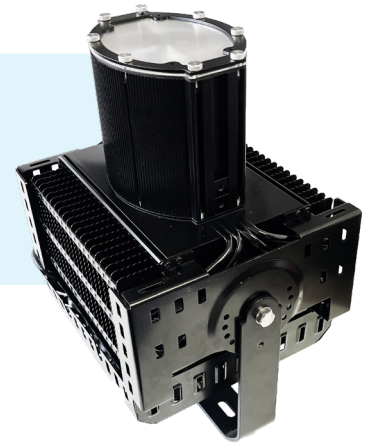

NEW LED Line Projectors

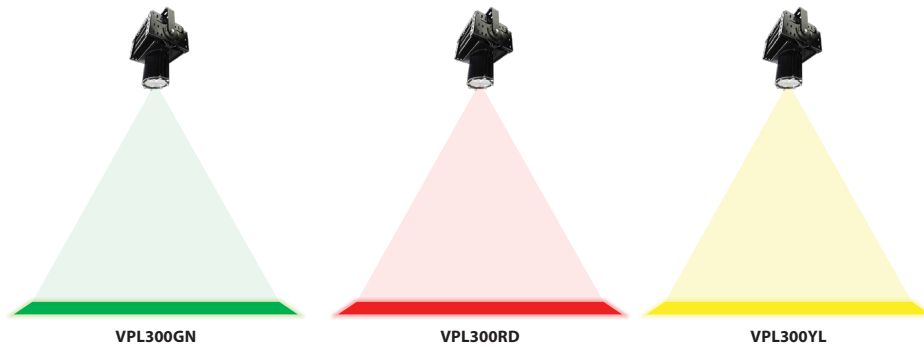

Utilize LED line projectors to create walkways and crosswalks in any facility and enhance safety, promote efficiency, allow real-time adaptability, offer a cost-effective solution, comply with regulations, and prevent accidents and injuries.

- 100W LED Line Projectors are a NEW and more cost-effective solution, that offers more color choices. (Green, Red & Yellow)
- Over 40000-hour (4.5 to 5-year) life cycle
- Higher installation capabilities (15' – 30' installation height)
- Longer linear footage projections (anywhere from 12' – 27')
- Wider line projections (3" – 6" widths)
- Exceeds OSHA recommended line widths (2" – 4")
- Projector is designed for bright warehouse environments
- Low temperature range is effective in freezers and sub-zero facilities (-13°F to 104°F)
- 1 Year warranty offers added reassurance
- Easy install plug & play with mounting hardware included

Higher Installation, More Colors & Better Clarity!
